# **BITE SPLINTS**

### Bite splints can be fabricated with a minimal amount of information:

- A preparation scan
- An antagonist scan
- Notes as to Upper or lower
- · Notes as to hard or Keystone hard/ soft
- Notes as to permissive or directive type of guide

## All Splints are designed to meet or exceed FDA Guidelines

### **Preparation Scan**

Good clear extensions all around the arch

Extend scan behind the second molar in order to secure good retention. Make sure the occlusal table is clear of distortions or tears.

## **Antagonist Scan**

The antagonist scan should be free of distortion or tears

A Good clear occlusal scan
